Quality FootCare Products

ABOUT US AND OUR MISSION

Quality FootCare Products has been supplying podiatry and chiropody professionals since 1995. We are proud to say that QFC may be the best resource for equipment, instruments and general quality supplies for the podiatric industry. With competitive pricing and attentive personalized service.

Our promise to you is to provide quality products at fair and reasonable prices. Our goal is to find ways to save you money without compromising on quality. We promise to do that by processing and shipping your orders accurately and efficiently. Lastly but certainly not least - we promise to keep current with the newest products available and dedicate ourselves to the satisfaction of you, our customers.

How to order

We make it easy for you to order.

You may order by fax, email or phone. We even provide a $2 discount on most emailed or faxed orders. If you are new to us, we would request that you pay your first order by credit card. (Hospitals, Family Health Teams and many organizations are exempt from this - please call if you have any questions.) Once established you will be entitled to thirty days free credit - pay after you have received your orders. In most cases product returns or exchanges require only a phone call or email to let us know what you might be returning. We request that instruments be wrapped so that they are protected during transit. Should any of our products require attention at any time, please call us at 1-866-833-9352 or email us at quality@qfootcare.com.

We do not have a retail location yet- but we will do everything we can to make sure your order is delivered safely to your door. We do have showrooms where we are able to display equipment - please call for an appointment if you are interested.

FAQ: free shipping, mininum orders, etc.

We provide free shipping on most orders over $100. Most orders under $100 are charged a small shipping and handling charge of $10 or slightly more for heavy, bulky or difficult to ship orders.
Back-orders are almost always shipped free of charge.
We request that you try to meet our minimum order of $50, but in urgent situations please call and we will see what is possible.
The majority of our orders are shipped the day after they are placed by expedited parcel post. Delivery varies from one to five business days. You can visit www.canadapost.ca for more details.
If you require more urgent delivery, please inform us of your needs when you place the order. Expedited parcel is not a guaranteed service.
If you are not 100% happy with your order, please contact us.
PRICE MATCHING - In those rare occasions our prices are not the lowest we will endeavour to match whatever deal you have found. There are some exclusions and exceptions.

How to return goods

At Quality FootCare, we make it easy for you to return products.

The most important information we need is your invoice number and what you are requesting (replacement, credit, refund, etc. included with your return). The pdf file (Return Merchandise Form) that can be found on our website makes it very easy to return merchandise without the bother of getting an RMA or RGA number.

Equip your exam room your way

Leasing

- 100% financing
- No annual review or audits
- Doesn't affect credit lines
- Payment is fixed
- Easy to budget and plan for the future
- Conserves cash for operating costs
- Pay as you profit from equipment
- Some Leases are tax deductible
- User friendly, personalized service
- Early purchase options available
- Flexible to meet your needs
- Fast credit turnaround
- Faster tax write off possible

Borrowing

- Various user fees charged
- Down payments common
- Floating rates
- Premiums charged to lock
- Affects credit lines
- Reduces borrowing power
- Subject to annual review
- Maintenance fees charged
- Credit turnaround slower
- Fees raise effective rates
- Less customer service oriented
- Less flexibility in terms

An investment in quality

A guide entitled, "Recommended Procedures for Care, Maintenance and Sterilization of QFC Surgical Instruments" is available on page 60.

All QFC instruments are supplied non-sterile unless specified otherwise. When you purchase QFC instruments, you are investing in quality products. Care and maintenance will prolong their lives and afford the user with many years of trouble free service.

After removing from packaging, QFC instruments should be cleaned and sterilized before use.

During cleaning and sterilization cycles do not mix dissimilar metal instruments. Keep stainless steel/chromium plated/ silver plated instruments etc. separate and do not process in the same cycle; otherwise corrosion or staining may occur on the stainless steel instruments.

In all procedures, ensure that the instruments are in their unlocked, open positions and that the joints are exposed to the cleaning/sterilizing processes. If instruments are locked during sterilizing, stresses in the joints will be produced which will eventually weaken the joints and lead to fracture.

autoclaves

EZ9 & EZ10 - The Fully Automatic Autoclaves
ALL YOU DO IS SET IT AND WALK AWAY!
EZ9-plus and EZ11-plus with computer download now available (USB and network ports)

Chamber Dimensions 9" x 18"

Chamber Volume 5gal - 19L

With the simplicity of one touch design all your sterilization and drying needs are fulfilled. The Tuttnauer EZ9 & EZ10 fully automatic autoclaves will fill, sterilize, exhaust and dry at the touch of a button.

- Closed door active drying system to maintain sterility and ensure efficient drying of packs and pouches.
- High efficiency air pump circulates hot air after the sterilization cycle for automatic fast drying.
- Optional internal printer for convenient, comprehensive documentation.
- Pre-loaded automatic cycles match your sterilization needs.
- 2 year parts and labour warranty.

Chamber Dimensions 10" x 19"

Chamber Volume 6gal - 23L

EZ - Filter
Hepa Filter
for EZ Autoclave
$85.00

EZ - Paper
Thermal Chart
Recording Paper
5/box **$24.50**

Sterilization/Drying Racks
Fits EZ9 and EZ10, for proper sterilization and drying of pouched instruments. **$46.00**

Valueklave 1730

- Fast Cycle Time (11 minutes from a hot start) (Standard unwrapped cycle time).

Chamber Dimensions 7" x 13"

Chamber Volume 2.5gal - 7.5 L

When you require instruments that are "sterile to the point of use" - the Eclara delivers!

Eclara 11
Class B Autoclave

The Elara 11 is designed for sterilization of wrapped, porous and hollow loads.

- Short cycle and high volume pre and post vacuum pump for perfect class B sterilization results
- 316L grade stainless steel chamber and door with electro-polish finish
- A built-in steam generator provides steam and facilitates a standby steam mode
- The door closes smoothly and locks automatically

Chamber Dimensions	Chamber Volume
11" x 20"	7.5gal - 28.5L

Water Distiller
Tuttnauer offers a distiller that provides pure water that is 99% free of total dissolved solids. These distillers eliminate the inconvenience and expense of buying bottled water. Their ease of operation makes them ideal for any medical, dental or laboratory application.

- Automatic Shut-Off
- Stainless Steel
- Non Aluminum Condenser

When STERILE "to the point of use" matters...

Chamber Brite
Effectively cleans and descales the chamber reservoir and tubing of most steam autoclaves.

- **CB0010** (10/bx) **$64.00**
- Pre-measured packs
- No pre-mixing required
- Usage promotes efficiency
- Easy to store and odour-free

autoclaves

Bravo - Class B Sterilizer

The Autoclave of the Future!

- Fast cycle times
- Fractionated vacuum system
- Closed door drying with Dri-TecV technology
- Easy to use – single button operation
- Conforms to international and national standards
- Integrated printer option
- Patented door locking mechanism and steam generation system
- 17 or 21L chamber capacity
- 120V or 220V options

The Bravo is a fractionated vacuum sterilizer that incorporates both pre-vac (to remove air) and post-vac (to help drying) cycles to ensure perfect steam penetration for any load. Bravo is true to the STATIM reputation for speed, providing rapid cycles for instruments.

Cassette Sterilizers

Statim 7000

- 12 minute unwrapped cycle
- 15 minute wrapped cycle
- 12 minute Dri-TecS drying technology
- Internal water filtration system allows for tap water
- Sterilizes up to 10 pouched packages
- RFID seal technology
- Easy serviceability
- Removable water reservoir

Statim 5000

- Ultra-fast 9 minute unwrapped cycle
- 17.5 minute wrapped cycle
- Exceptional instrument turnover
- 15 minute Dri-TecR Drying Technology
- Single use water
- Aseptic transfer of instruments
- Reduced instrument investment
- Prolongs instrument life

CL2100

Prestige 2100 Classic (9 Litres) offers the most cost effective solution for the world's preferred method of sterilization.
Stylish aesthetics, fantastic price, and a host of enhanced features. Meets the exacting needs of the healthcare pro.
Note: Drying cycle not available in this unit - may be required in some jurisdictions.

Miltex Instrument Prep Enzyme Foam
24 oz. (0.71 liter) spray bottles
Ready to use foaming spray for pre-cleaning of soiled instruments. Ideal for applications where instrument cleaning is not immediately available. Active enzymes work to breakdown blood, mucous and other bio burden for reduced cleaning time.
MIL3-760 $16.00

Surgical Instrument Stain Remover
Removes stains, tarnish and restores luster to instruments
MIL3-740 $12.80

Nylon Cleaning Brush
Ideal for safely cleaning hard to reach places.
MIL3-1000 $6.50
With stainless steel bristles for extra difficult cleaning
MIL3-1001 $6.50

Spray Lube
8 floz. Pre-mixed, non-silicone, anti-corrosive lubricant
MIL3-700
$12.80

Surgical Instrument Cleaner
8 floz. Neutral pH liquid cleaning concentrate makes 32 gallons
MIL3-720 $12.80

100 Kimberly-Clark® wipes
saturated with Micro-Kleen3 solution in a dispenser canister 6.25'' x 10''
WF MKW06-100 $17.00

Opti-Lube
16oz Sprayer
Ready to use lubricating rinse solution for surgical instruments prior to steam sterilization
WF OLR12-106 $13.80

Micro-Zyme Cleaner
3.78L Jug
Concentrated Ph neutral enzomatic pre-soak and detergent. Formulated for cleaning of instruments and medical devices
WF MZ04-128 $65.00

Micro-Zyme Gel
652ml
For use as a pre-soak. Dual enzyme quickly and effectively dissolves blood, tissue, mucous and other soils
WF MZTG12-022
$16.00

Micro-Kleen 3
Fast-acting, broad-spectrum surface disinfectant suitable for critical areas with accelerated kill-time formula.
WF MKS12-024
$ 12.90

ultrasonic cleaners

Ultrasonic Cleaner
CSU1 - 1 Gallon
- High efficiency 60 kHz cavitation for a thorough and quieter cleaning
- Durable vinyl clad steel housing - easy to clean and resists scratching
- Full line of accessories available

Ultrasonic Cleaning Tablets
Easy to use tablet form.
Eliminates handling of heavy 1 gallon containers.
- No bulky storage
- No pre-mixing required.
- Enzymatic solution effectively breaks down protein.

64/bx - **CS0064** **$64.00**

Biotext
Hospital level - clinical universal surface disinfectant
Will not corrode metal, stain vinyl or stick to surface.
BIO60 - 60ml **$14.00**
BIO500 - 500ml refill **$24.00**
BIO-sprayer **$3.00**
- when ordered with refill
More Biotext products on page 61

Complete range of BioTEXT and BioSON products now available!

Wide range of sizes, options and accessories available for Tuttnauer ultrasonic cleaners.

quality@qfootcare.com

Instrument Washers
This powerful countertop washer is your first step to effective sterilization. If it's not clean, it can't be sterilized.
- Touchscreen display

Capacity and Cycle
- 10-cassette (8" x 11") capacity
- 4-cassette (8" x 11") capacity
- Easily configured for loose instruments and various cassette sizes
- Fast wash cycle and efficient water use

Mechanical and Construction
- Active drying system consisting of heater and blower dries instruments rapidly and prevents corrosion
- Stainless steel 304 construction
- Integrated liquid chemical dosing system assures accuracy, minimizes user intervention and requires no additional cabinet space
- Printer or datalogger (optional)

Chamber Brite
Effectively cleans and descales the chamber reservoir and tubing of most steam autoclaves.
- **CB0010** (10/bx) **$64.00**
  - Pre-measured packs
  - No pre-mixing required
  - Easy to store and odour-free

Self-Seal Sterilization Pouches Professioal Choice
(Different sizes, other designs available).
Featuring internal and external class 4 indicator strips

442089	2.25" X 4",	200/bx	**$9.00**
442090	2.75" X 10",	200/bx	**$11.00**
442100	3.5" X 6.5"	200/bx	**$11.00**
442101	3.5" X 9"	200/bx	**$12.00**

Accel TB
Ready-To-Use One-Step Disinfectant Cleaner. Effective against a broad-spectrum of pathogens in only 5 min. **$10.95**

Accel TB Disinfectant
Wipes, 6" x 7" (15.2 x 17.8cm)
$17.95

Accel CS 20
Achieves chemical high-level disinfection in just 20 min. **$15.95**

Accel WASH
Device/Instrument cleaning solution. The ability to clean all soil types present without the use of enzymes as well as bacteriostatic.
$ 17.95

SPS medical
Sterilization Monitoring • Packaging • Tes: ng Services

Biological Indicators

Economy SporView® Starter Kit
Contains Dry Block Incubator, record notebook, vial crusher and box of 25 Indicators. An in-office Biological Indicator (BI) system certified for use with ALL steam sterilization cycles. This system gives clear, easy to interpret results for monitoring the effectiveness of the sterilization process. Final results are known after only 24 hours incubation in any compatible dry block incubator operating at 55-60°C. For users convenience, SPSmedical offers a calibrated 60°C dry block incubator that comes with 15 wells and a lifetime warranty. **SK-116** **$250.00**

SporView® Starter Kit Plus
Contains all of the above plus SSI Class 5 integrators for immediae feedback and steam indicator tape to complete your system. **SK-115** **$290.00**

Biological Indicator Mail-In System
Biological indicators are for use in monitoring health care Steam sterilization processes, providing a direct measure of the lethality of the process. Both mail-in and in-office systems are available for steam sterilizers, providing 24 hour incubation. Mail-in:
12/bx - **EMS-012** **$140.00**
52/bx - **EMS-052** **$450.00**

Replacement Vials
SporView® BI System
25/bx - **SCS-025** **$85.00**
100/bx - **SCS-100** **$250.00**

quality@qfootcare.com

SPS medical Chemical Indicators

Chemical Integrators
STEAMPlus is an immediate readout Class 5 device approved for use in all steam cycles. This four inch strip has distinct pass/fail criteria and is cleared by the FDA as equivalent in performance to a biological indicator. This technology offers the hughest level of sterility assurance in the form of a chemical indicator, but does not replace the routine use of a biological indicator.
SSI-100 (box of 100) **$60.00**
SSI-1000 (box of 1000) **$360.00**

Lantor Cube®
Bowie-Dick Test
Test Packs should be used daily with dynamic air removal steam sterilizers (for example, Bravo or Eclara sterilizers) to detect air leaks and ineffective air removal. Both reusable and disposable formats are available. Pack 25/pk, Latex Free - **LCR-025**
$148.00 per 30

Indicator Tape
Indicator tapes provide immediate identification of processed items while it also serves as a closure to seal sterilization packs. Colour change indicator verifies exposure to sterilization process. Tapes are individually packaged in 60 yard rolls and available in multiple widths. Tapes are available in both regular and latex/lead free versions.

Tape Dispenser
TD001 **$40.00**

Chemical Indicator Pen
Professional Choice
To identify and monitor items that are steam processed. ink changes from black to red when processed. Works on non-porous surfaces (metal, glass).
SIP-001 **$32.00**

Recordkeeping Book
RN-025 **$30.00**

Steam Indicator Tape roll
1/2" - **ST-072** **$6.00**
3/4" - **ST-048** **$7.00**

Chemical Indicator Strips
Each chemical indicator (CI) strip provides distinct colour change when exposed to the sterilization process. An internal CI should be used within each package or tray to be sterilized. Four inch strip can be written on and kept as a permanent record. Eight inch strip can be used as is, or torn in half at the perforation for smaller packs. (250/bx)
4": **SIS-250** **$24.50** 8": **SIL-250** **$29.50**

chairs & accessories

530 Quad Power Podiatry Table
Features a full 24" width and power foot section allowing your patients to enter the chair effortlessly from the front or side of the table. Four user-programmable positions assure rapid movement to often used positions. Positions from upright to contour, flat, and trendelenburg are easily attained with the power lift, back, tilt, and foot functions.

- Ultra quiet 24-volt low voltage DC electric gear motors
- 24" maximum width of table
- 16" vertical travel power lift base with a 23.5" entry height
- Non-articulating rectangular headrest
- 10 1/8" x 14 ½" x 2 ½" stainless steel debris extends a full 12 inches using KTL Cataphoresis coated slides
- All steel frame and cushion substrates
- Smooth Velcro®-attached upholstery in standard foams (optional memory foams and Ultraleather™ styles available)
- Choice of foot control, remote hand control, or back mounted hand switches* with auto return, stop/cancel, and any button cancellation
  *Factory installed only

Removable Leg Wrapping Support

Avoid health care professional injury by using MTI's patent pending leg wrapping support. The patent pending leg wrapping support is a dual function support providing a calf support for wrapping the foot/heel and a heel support for wrapping the rest of the leg. The removable leg wrapping support is made from aluminum for a light-weight yet very strong support and is non-porous coated for ease in cleaning and disinfecting. The support can easily be moved to either the patient's left or right hand side of the foot section for ease of wrapping either leg or heel.

527WP Tri Power Programmable Bariatric Podiatry Chair
Features a full 30" width and a low ADA compliant 19" entry height provides easy patient entry. Two user programmable positions assure rapid movement to often used positions. Positions from upright to contour, flat, and trendelenburg are easily attained with the power lift, back, and tilt functions of the MTI 527WP Bariatric Podiatry Chair.

Cover for MTI Foot Control Available

527S Tri Power Non-Programmable Podiatry Chair
Features a full 24" (61 cm) width and a low ADA compliant 19" (48.3 cm) entry height provides easy patient entry. A rapid position switch which operates the lift up and tilt simultaneously assures rapid movement to an optimal patient position. Positions from upright to contour, flat, and trendelenburg are easily attained with the power lift, back, and tilt functions.

- Ultra quiet 24-volt low voltage DC electric gear motors
- 24" (61 cm) maximum width of table
- 10 1/8" x 14 1/2" x 2 1/2" (25.7cm x 36.8cm x 6.4cm) stainless steel debris extends a full 12" (30.5cm) using KTL Cataphoresis coated slides
- Footrest extension adjustment with dual locks are located on both sides at the end of the footrest
- All steel frame and cushion substrates
- Designer Velcro®-attached upholstery in standard foams (optional memory foams and Ultraleather™ styles available)
- Choice of foot control or remote hand control with auto return, stop/cancel, and any button cancellation
- Rapid position switch powers the lift up and tilt up at the same time when the switch is held down, providing your desired position quickly and efficiently

Also available is the 527P Fully Programmable Podiatry Chair.

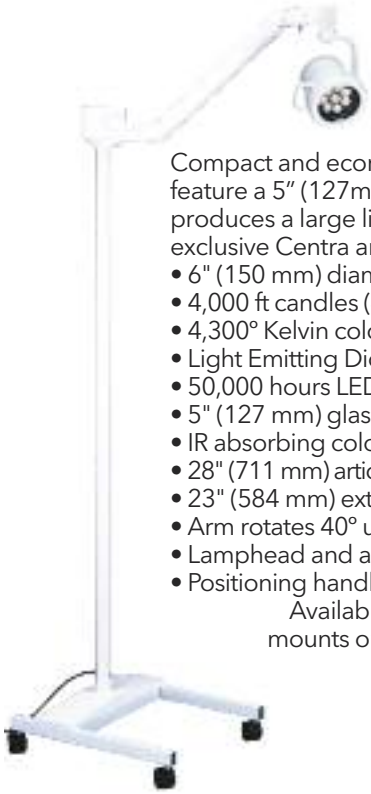
MTI provides two different types of upholstery: Premium and Ultraleather. If one of our standard choices doesn't fit your office décor, contact us for non-standard colour charts for a larger variety of colors or send us your own fabric to match the décor of your office.

SG Series Hand Operated Pneumatic Chair
Pneumatically adjust the seat height for your most comfortable working height quickly and easily using the hand lever. Dual wheel casters maneuver quietly and smoothly over all types of surfaces and without damaging or marring the floor. Soft and supportive seat with MTI physician/assistant seating.

- Hand lever actuates gas spring
- Five-caster black composite base
- Two options for height adjustments
- 16.5" (41.9 cm) round deep padded seat
- Optional ergonomic backrest
- Dual wheel casters or glides

Accessories Available
Visual curtain blocks (two types), chair mounted Mayo tray assemblies, shoe trays, and exam lights

lights & cabinets

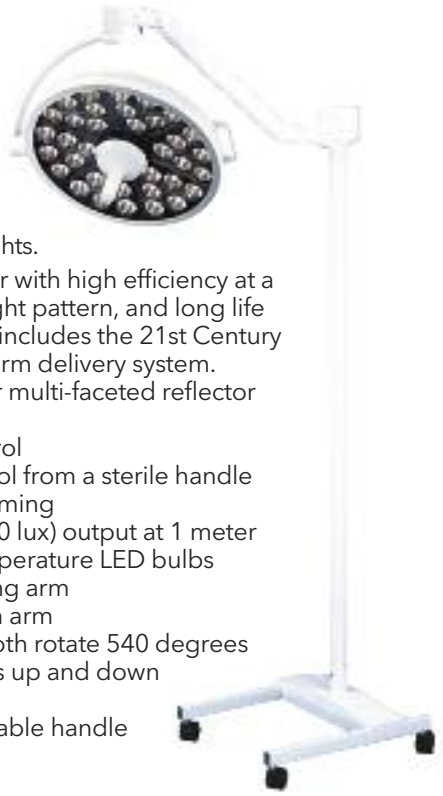


MI 500 LED
Exam/diagnostic light

Compact and economical - the MI 500LED feature a 5" (127mm) dichroic glass reflector produces a large light pattern and the exclusive Centra arm delivery system.

- 6" (150 mm) diameter flood pattern at 24"
- 4,000 ft candles (43,000 lux) at 24" (61 cm)
- 4,300° Kelvin color temperature at 24"
- Light Emitting Diodes (LED)
- 50,000 hours LED rated lamp
- 5" (127 mm) glass dichroic reflector
- IR absorbing color-correcting glass filter
- 28" (711 mm) articulating arm
- 23" (584 mm) extension arm
- Arm rotates 40° up and down from horizontal
- Lamphead and arm both rotate 540°
- Positioning handle mounted on lamphead

Available with ceiling, wall mounts or portable floorstand



MI 1000 LED
Series Surgery Light

Represents a new standard in minor surgery lighting with its green technology LED lights.

Features a larger reflector with high efficiency at a very low heat, a larger light pattern, and long life LED bulbs. The MI 1000 includes the 21st Century Series exclusive Centra arm delivery system.

- 16" (406 mm) diameter multi-faceted reflector for excellent shadow control
- 5 stage dimming control from a sterile handle provides 50-100% dimming
- 6,000 ft candles (64,500 lux) output at 1 meter
- 4300° Kelvin color temperature LED bulbs
- 28" (711mm) articulating arm
- 23" (584mm) extension arm
- Lamp head and arm both rotate 540 degrees
- Arm moves 40 degrees up and down from horizontal plane
- Removable and sterilizable handle

MTC-1 Mobile Treatment Cabinet
The MTC-1 is a 33.5" high and 24" wide mobile treatment cabinet with 5-Drawers and a 4" Backsplash. Features European construction and styling, soft curves with premium materials, and contemporary ergonomic engineering. Drawers are all constructed with heavy molded edge guards for durability.

- Choice of standard 21" deep or slim line 18" deep models

OSIT-2001 Mobile Instrument Table with Solid Surface Top
Provides a stable and adjustable solid suface working surface with a 21" x 12" (53.3 cm x 30.5 cm) pullout tray for support of an instrument tray for an additional working surface.

MTC-A Mobile Treatment Cabinet
The MTC-A is a 33.5" (85.1 cm) high and 24" (61 cm) wide mobile treatment cabinet with 3- Drawers, 2-Doors and a 4" (10.2 cm) Backsplash.

Magnifying Lamps
Circular lamp with 3X magnification attaches to desk or cabinet. Various models available.
Maglight starting at $134.00

Plinth | 2000

Strong and extremely well proven podiatry chair that has set the market standard.

Divided Leg Podiatry Chair (Split Leg)
Model **503CD**

Entry level single motor chiropody/podiatry chair, extremely strong, stable & versatile being particularly suitable for biomechanics & multi-disciplinary use. The 503CD offers excellent access, patient comfort and is available with foot control. Single leg version also available as Model 503C.
Features: unique lifetime guarantee, easy operation, low running costs, high density fire retardant foam, hardwearing anti-microbial vinyl, removable fold back arm rests, divided legs, extending & removable heel pads, able to lift 225kg from its lowest height, full choice of accessories and colours.

Tilting Podiatry Chair
Model **503CDT**

The 503CDT twin motor chair is our most popular with all the features of the robust 503CD plus the added benefit of trendelenburg seat tilt (greatly enhancing patient comfort and allowing the foot end to rise to a full 153cm (60") for unrivalled acess for heelwork or for operating when standing up). Comes with water spray and top quality podiatry hand-piece.
3 Year Warranty, CSA Certification.

The MTI DV-1 Dust Vac™ uses a high volume vacuum motor and a large diameter hose and tip to help create high velocity air movement at the burr. This large volume of "directed" vacuum can remove more dust particles than other type systems.

Large diameter hose and stainless steel vacuum nozzle for up to 40% greater air flows than competitive models.

20K Pro Power PLus
Lithium battery, 1 year warranty and low vibration AUTOCLAVABLE hand-piece.
$560.00

MTI Dust Vacuum Adaptor Kit
Correct kit is needed to use drill with MTI vacuum system. **$105.00**

Powerful 30,00 RPM Portable Drills
Up to 10 hours working charge

Gordon's No. Five spray foot powder's unique action helps stop perspiration and odour, and relieves hot, tired feet. **GL1017-4** **$13.00**

Mycomist Fungicidal, sanitizing deodorant spray for shoes and boots.
GL1090-4 **$15.00**

camillen

Foot Balm Diabetic for very dry, sensitive skin, with 10% urea
Intensive care for very dry, rough and sensitive skin. A special combination of active substances with 10 % urea supplies the skin with moisture; supports natural skin functions and prevents dehydration. Especially suitable for diabetics.
CAM8008.2 **$12.50**

Foot Deo Balm against foot odour, long-lasting
A mild concentrated cream that deodorises and acts against foot perspiration, burning feet, soreness and itching between the toes. The special ingredient aluminium chlorohydrate protects against foot odour by preventing the bacterial decomposition of body perspiration. With mild ingredients, Foot Deo Balm offers dependable, long-lasting care and relief for sore feet too.
CAM8018.2 **$11.00**

Fresh sensitive for dry and sensitive skin
(150 ml Bottle)
In addition to the FRESHUP complex, includes 5% urea to balance moisture loss and soften the skin. In addition, to caring for sensitive skin, the anti-inflammatory and conditioning active ingredients of echium oil and cardiospermum are used. This renders the foam especially suitable for dry, sensitive skin, e.g. that of diabetics.
CAM8055 **$13.50**

Fresh Hydro for very dry skin
(150 ml Bottle)
In addition to the FRESHUP complex, includes 10% urea, balances moisture loss, softens the skin, makes it elastic and more resistant. For the care of very dry skin, aloe vera gel is included.
CAM8056 **$13.50**

FRESHUP Complex

FRESHUP complex found in all fresh foam products- Camoile oild combined with bisabolol, glycerine, pathenol and grape-seed oil to care for and protect foot skin. Lemon grass and fruity oils provide a gentle scent.

Fresh Intense for cracks and calluses
(150 ml Bottle)
Intensely caring balm with FRESHUP complex, 15% urea and shea butter. Callus formation is reduced by regular use and cracked, rough skin areas prevented. Non greasy, quickly absorbed, and protects the skin against drying out.
CAM8057 **$13.50**

Fissure Cream for rough and cracked skin areas
- smoothes extremely dry and flaked skin areas specifically on the elbows, hands and feet.
- stores moisture in deeper tissue layers
- soothes sensitive skin
- supports natural skin functions
- reduces callus
- supports regeneration of the skin
- nourishes skin to render it soft and smooth

CAM8080.2 **$11.50**

FUDE Foam -
protect and care sensitive skin against fungus
100 ml Bottle

The foam is quickly absorbed and doesn't leave a greasy film behind. Skin stays healthy, elastic and retains its natural protective qualities.

Application
Shake well before use.
Hold upside-down for application
CAM8071 **$15.00**

FUDES Solution -
protect and care skin,
toenails and fingernails
20 ml Bottle with glass pipette

A combination of antibacterial substances, benzoic acid, usnic acid and the antimycotic properties of undecylenic acid provide skin and nails with long-lasting protection against fungal attack.

The anti-inflammatory properties of bisabolol, the high quality active ingredients extracted from the witch hazel together with the proven effect of panthenol combine to protect and care for skin, toenails and fingernails. Regular application protects against fungal infection.
CAM8077 **$11.00**

FUDES Spray - care and hygiene
with fungal protection
100 ml Bottle

Antibacterial ingredients and alcohol disinfect and cleanse. Chamomile, gromwell root and the Asian marsh pennywort provide effective care for the sensitive between-toe zones where the skin is vulnerable and often subject to irritation. Antimicrobial and fungicidal properties derive from undecylenic acid and usnic acid (obtained from beard moss).
CAM8079 **$17.00**

Callus Pro-spray for
professional use only

Even faster and more effective with 20% urea and chamomile extract.
Spray directly onto the callus and allow to act for 1 – 2 minutes. The callus is then easily mechanically removed with all common instruments. After callus removal, coat the skin well with nourishing balm to prevent reformation of callus.
CAM9115.1 - 50ml spray bottle **$8.00**
CAM9115 - 200ml spray bottle **$20.00**
CAM9115N - 1000ml refill **$59.00**

Foot Bath Salt
350 g jars **$11.00 (your choice)**

CAM8040 Classic Refreshing Bath Salt
CAM8041 Aloe Vera and Olive
CAM8043 Blueberry / Algae
CAM8044 Kiwi / Melissa
CAM8045 Strawberry
CAM8046 Orange / Papaya

Callus Balm reduces callus,
with 15% urea
100 ml Bottle
Easy to apply formulation with 15% urea
- intensive care of callused skin
- reduces callus
- protects against drying out
- absorbs quickly

CAM8011.2 **$12.50**

Summit Dopplers

Summit Doppler Systems offer great sensitivity, high fidelity sound and the latest technology. These are the best Doppler systems Summit ever designed… and they have been designing Dopplers for over thirty years. Performance-Reliability-Service. All Summit products are backed with the highest standard of support and service.

L250AC Package

L250AC Package
The LifeDop ABI System features a portable bi-directional Doppler wih compact printer for the diagnosis of Peripheral Arterial Disease (P.A.D.) The sysem includes Doppler, printer, adhesive-backed label paper, bi-directional probe, ABI charts, forms, ABI video, examination guide, quick reference guide and ABI glossar, with 4 cuffs and aneroid package.

The system includes:
- Compact bi-directional hand-held Doppler - auto-calibrated
- Modular printer with adhesive-backed label paper
- Automatic waveform scaling with fast printout
- 8MHz bi-directional probe
- 4 cuffs and Aneroid (10 & 12cm)
- ABI Chart
- Report forms (pack of 50)
- ABI Video, Examination Guide, Quick Reference Guide, and ABI Glossary
- ICD9 Code listing

L150R
The LifeDop L150R features a non-display, hand-held Doppler with superior sound quality, extended battery life, enhanced probe sensitivity, user replacement probe cable, interchangeable probes and a full warranty.

Each Doppler comes with your choice of one probe. Popular choices include:
8MHz - designed to ease location of surface vessels with a narrow beam and pencil-style shape
5MHz - designed to ease location of deeper vessels with a medium beam and pencel-style shape
4MHz - designed to ease location of blood vessels with a broad, wide-angle beam

VANMAX New from Summit Doppler
The Vantage ABI..... Simplifying the diagnosis of P.A.D.
The true one-button ABI system that performs the ABI exam in **as little as three minutes**. Now, diagnosing Peripheral Arterial Disease for the 8-12 million Americans affected can be done fast and accurately.
The Vantage ABI uses an innovative cuff-based technology for performing the ankle-brachial index (ABI) exam to assist in the diagnosis of peripheral arterial disease (P.A.D.).
The system provides accurate determination of the ABI across the full range of P.A.D. The technology, developed by Summit Doppler, was co-invented in cooperation with researchers from the Cleveland Clinic. It uses DFO waveform analysis, a significant improvement in ankle pressure determination and peripheral arterial disease assessment over traditional forms of oscillometric ankle pressure estimation.

Stein's
The authority in podiatric padding and supplies since 1929.

Volare Adhesive Corn Pads

- Fine quality polymeric white foam
- Latex-free, non-toxic and hypo -allergenic
- Excellent cushioning for sensitive areas without bulk
- The most advanced concept in podiatry
- Super adhesive backing

C-1 (500 Pack) – **765-1050** **$60.50**

W-7 (500 Pack) – **765-1053** **$60.50**

Why Use Rolls?

- Attention to quality – Only the highest grade materials and adhesive
- Added flexibility – Can be cut into any size or shape for a customized fit
- For further customization - Most rolls can be skived
- Large selection – Available in many widths, lengths and thicknesses
- Most rolls are color coded for easy thickness identification: Pink – 1/8", White – 1/4", Flesh – 1/16" and 3/16"

Lifetime Guarantee

At Quality FootCare, we maintain a simple philosophy, "we like happy customers". This is why all QFC reusable surgical instruments are covered by our unrivalled lifetime guarantee.

Should any of our reusable instruments crack, bend, deform, corrode or fail while being used for its intended purpose, we will simply replace it with a new one or repair it free of charge. This guarantee applies throughout the working life of our instrument.

We do not require any purchase order numbers, copies of invoices or other proofs of purchase. The QFC brand on the product acts as your guarantee. All we ask is that the instrument is cared for and not abused. Our guarantee does not cover wear and tear. Please refer to our recommended procedures for care, maintenance and sterilization of QFC surgical instruments on page 60.

Should any of our products require attention at any time, please call us at 1-866-833-9352 or email us at quality@qfootcare.com.

Personal Single Patient Use

(Not shown on this page)

Personal patient nail care products from QFC are a low cost, yet good quality range of instruments, designed for single patient use, as an alternative to professional reusable or single use instruments. Using personal single patient nail care products will help to protect your patients from infections borne from cross contamination. With simple care instructions, patients take their instruments home and bring them back for each appointment.

Our nail cutters offer similar levels of quality that you would expect from QFC, but are made from lower specification steel as they are not designed for repeated autoclaving.
Please note that due to their intended use, all personal nail care products are excluded from our lifetime guarantee.

Single Use Instruments - FAQ

How do I know if a device is for single-use?
It will have this symbol
on the packaging or the device:

What does single-use mean?
Do not reuse. A single-use device is used on an individual patient during a single procedure and then discarded. It is not intended to be reprocessed and used again, even on the same patient.

Is single-patient use the same as single-use?
No. Single-patient use means the medical device may be used for more than one episode of use on one patient only; the device may undergo some form of reprocessing between each use.

Why shouldn't they be reused?
Serious incidents relating to reuse of single-use devices have occurred.
Reuse can be unsafe because of risk of:

- cross-infection – inability to clean and decontaminate due to design.
- endotoxin reaction – excessive bacterial breakdown products, which cannot be adequately removed by cleaning.
- patient injury – device failure from reprocessing or reuse because of fatigue, material alteration and embrittlement.
- chemical burns or sensitisation – residues from chemical decon tamination agents on materials that can absorb chemicals.

Also, if you reuse a single-use device you may be legally liable for the safe performance of the device.

Can I sterilise a single-use device?
A few single-use devices are marketed as non-sterile. These may require processing, in line with the manufacturer's instructions, to make them sterile and ready for use.

You must not resterilise them.

Timesco Once (Single Use)

Our ONCE podiatry packs are a cost-effective alternative to reusable instruments with no compromise on quality.

tournicots

Tourni-cot rings make it simple and easy to occlude vessels during digit surgery. Rolling the elastic ring onto the digit squeezes blood from the field. Once in place, the ring applies reliable pressure to act as an exsanguinating tourniquet. Apply after anesthetizing the digit, and remove by cutting the ring at its notch.

Recommended Procedures for Care, Maintainance and Sterilization of QFC Surgical Instruments

Unless alternative instructions are supplied with individual products, these instructions apply. All QFC instruments are supplied non-sterile unless specified otherwise. The use of all QFC instruments should be limited to qualified personnel. An investment in quality - When you purchase QFC instruments, you are investing in quality products. Care and maintenance will prolong their lives and afford the user with many years of trouble free service. Please follow the care and maintenance guide. A guide to the most common problems associated with instruments and their solutions is detailed for your reference.

Care before cleaning and Sterilization

After removing from packaging, QFC instruments should be cleaned and sterilized before use.

During cleaning and sterilization cycles do not mix dissimilar metal instruments. Keep stainless steel/ chromium plated/ silver plated instruments etc. separate and do not process in the same cycle; otherwise corrosion or staining may occur on the stainless steel instruments.

At all times ensure any solutions/compounds that are used to clean/sterilize the instruments are neutral pH7. If low pH solutions are used they will cause black staining and high pH solutions will cause brown staining on the surface and in the joints of the instruments. If solutions do need to be used which are not neutral pH7, they must be thoroughly washed off afterwards by liberal amounts of demineralized water.

In all procedures, ensure that the instruments are in their unlocked, open positions and that the joints are exposed to the cleaning/sterilizing processes. If instruments are locked during sterilizing, stresses in the joints will be produced which will eventually weaken the joints and lead to fracture.

The majority of QFC instruments that contain joints or metal-to-metal contact (e.g. scissor blades) are supplied pre-lubricated. We recommend after removal from packaging the instruments are rinsed and cleaned prior to sterilization.

We do not recommend "WD40" or other industrial lubricants for our instruments. A specially formulated lubricant, (Instrument Lube MIL3-700), is available from QFC that is excellent for surgical instruments lubrication.

Rinsing

After removal from packaging or immediately after use, the instruments should be washed/rinsed with warm running water. Care should be taken to remove all traces of blood, saliva, mucous, saline solutions or foreign debris, especially from serrations and joints. Nylon bristled brushes or cotton wool may be used to aid this process. Under no circumstances must iron wool, iron bristled brushes or abrasives are to be used.

The instruments should then be cleaned – see "cleaning" and then thoroughly dried. At this stage the instruments should be carefully inspected to ensure that their working parts and function are not impaired. Any instruments that have joints or have metal-to-metal contact should then be lubricated with instrument lubricants and stored in a clean and dry environment.

Cleaning

Hand washing is recommended, especially for Micro, Ophthalmic and delicate instruments. If machine washing or chemical cleaners are to be used, the manufacturers instructions should be followed.

Ultrasonic cleaning

Ultrasonic cleaning is permissible (if instruments contain plastic components, check individual instructions supplied with instruments to confirm permissibility). After ultrasonic cleaning, the cleaning solution should be washed away by rinsing in demineralized water. The instruments should then be thoroughly dried and lubricated. We recommend Micro, Ophthalmic and delicate instruments are not ultrasonically cleaned as ultrasonic cleaning could impair the delicate cutting edges and tips of the instruments. Change ultrasonic solution regularly as recommended by solution manufacturer.

Disinfection

We do not recommend this form of cleaning. However, if no other option exists, it may be performed under strict guidelines. Disinfection may be performed by immersion or by washer sterilizers. Manufacturers instructions on concentrations of solutions and processing times should be strictly adhered to. After disinfection, wash thoroughly with sterilized water, dry the instruments.

Some disinfectants will cause corrosion to stainless steels. Allow minimum immersion time of instruments in solution as recommended by disinfectant manufacturer.

Change disinfection solution regularly and where recommended use corrosion inhibitors.

Caution Cleaning, rinsing, disinfection, and boiling render instruments "clean". They do not make instruments sterile.

Sterilization

Unless specified otherwise with instructions for individual products; sterilization may be performed by autoclaving, dry heat, flash autoclaving, gamma irradiation, cold sterilization or ethylene oxide.

We do not recommend "Glass Bead" sterilization– a process in which only the front, working end of the instrument is inserted into a heated vat of glass/silica beads. As this process may not destroy any migrating spores or bacteria which may be at other parts on the instrument away from the working end. This form of sterilization may also lead to instrument discolouration and early fracture– due to variable temperature gradient from the front to the back of the instrument.

Some instruments cannot be sterilized by all of the above processes. Consult individual instructions supplied with instruments that indicate suitable sterilization method. Do not allow temperature of sterilizers/ autoclaves to exceed 180 degrees centigrade, otherwise, the instruments may be discoloured or their strength (temper) may be impaired.

IMPORTANT - Always sterilize instruments in their open positions.

Disengage all ratchets (locks) and ensure sufficient surface of the joints is exposed to allow the sterilizing medium access to the surfaces hidden under the joints (box locks for example). If instruments are sterilized in a process where heat is involved and the instruments are left in their locked positions, the joints will crack.

After sterilization the instruments should be allowed to cool and fully air dry before use.

Whichever process is used, adhere strictly to manufacturers sterilization instructions. Wherever water is used in sterilization procedures, e.g. in "steam autoclaving", we recommend salt free demineralized water is used instead of tap water. *Caution* For dry heat (hot air) sterilization we recommend paraffin oil is used to lubricate the joints and ratchets of instruments before sterilization.

Caution Avoid the contact of your surgical instruments with the following materials as these materials will cause discolouration/corrosion that could lead to failure.

Abrasives, Aluminium chloride, Barium chloride, Betadine solutions, Bleaches, Bromine, Iodine, Mercury or its compounds, Peroxides, Potassium chloride, or any liquids, compounds which produce volatile/corrosive vapours.

Always be gentle and treat your instruments with care.
